CODE OF ETHICS IN RESEARCH

The institution considers plagiarism and any other malpractices in research very deteriorating for status of higher education and a bane in persuasion of academic excellence. For removal of such malpractices in research and other forms of academic writing the institute put forward following guidelines for authors and fellow contributors :-

- i). Each academic write-up should accompany a list of reference in any official format.
- ii). All the sources of references should be properly cited in any official format.
- iii). The author has a final and abiding responsibility to properly cite/reference any piece of information/material.
- iv). The affiliating university checks the Ph.D. thesis for plagiarism and provides a certificate in this regard which is a statutory document at the time of thesis submission.
